

HIMANSHU GHOSH

Software Engineer Intern

+91-7906350740 — himanshu07ghosh@gmail.com — linkedin.com/in/himanshu-ghosh/ — github.com/himanshu07ghosh

Summary

Third-year B.Tech Computer Science student with software engineering internship experience in full-stack web development and machine learning. Strong foundation in Java, Python, Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems and Computer Networks. Experienced in designing, developing, testing, debugging, and deploying scalable software applications using Git-based collaborative workflows.

Technical Skills

Programming Languages: Java, Python, C++, Javascript, SQL

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems, Computer Networks, Time & Space Complexity Analysis, REST API Design, Software Engineering Principles

Frameworks & Libraries: React.js, Flask, Django, TensorFlow, Scikit-learn, NumPy, Pandas

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, VS Code, Jupyter Notebook

Cloud & DevOps: Microsoft Azure (currently learning)

Experience

Web Development Intern

June 2026 – August 2026

Pinnacle Labs (Remote)

Technologies: HTML, CSS, JavaScript, REST APIs, Git

- Designed, developed, and deployed **3 production-ready web applications** using modern software engineering practices and Git workflows.
- Built a **financial analytics dashboard** that automated CSV-based P&L analysis and integrated RESTful APIs for real-time weather and news data.
- Reduced front-end page load time by **40%**, improving overall user experience.

Software Engineer Intern

October 2024 – December 2024

CodeAlpha IT Services Pvt. Ltd. (Remote)

Technologies: HTML, CSS, JavaScript, Git, GitHub

- Developed **3+ responsive web applications** using HTML, CSS, and JavaScript while following modern web development best practices.
- Improved UI rendering performance by **30%** through code optimization and collaborated using Git/GitHub for version control.
- Received the **Best Intern Award** for consistently delivering high-quality software projects ahead of schedule.

Projects

Emotion Detection System | *Python, TensorFlow, OpenCV, NumPy, Pandas*

2025 – 2026

- Developed an end-to-end CNN-based facial emotion recognition system using the **FER2013 dataset (35,000+ images)** for real-time emotion detection.
- Achieved approximately **88% classification accuracy** through data preprocessing, augmentation, and hyperparameter tuning.
- Built a modular ML pipeline for preprocessing, training, evaluation, and real-time webcam inference following software engineering best practices.

Global News Hub | *React.js, JavaScript, REST APIs, HTML, CSS* | [GitHub](#) | [Live Demo](#)

2026

- Built a responsive news platform using React with reusable component architecture and REST API integration.
- Integrated GNews and OpenWeather APIs to provide live news, weather updates, and location-based recommendations.
- Implemented bookmarking, category filtering, and dark/light themes to enhance user experience and application usability.

- Developed a financial analytics dashboard to process CSV trading datasets and generate automated **P&L insights**.
- Built interactive charts and visualizations for analyzing trading performance and market trends.
- Designed a responsive dashboard with efficient client-side data processing for fast and intuitive analytics.

Awards & Certifications

- **Best Intern Award – CodeAlpha IT Services Pvt. Ltd. (2024):** Recognized for consistently delivering high-quality software projects and demonstrating strong problem-solving skills during the internship.
- **Leadership and Team Effectiveness – IIT Roorkee (NPTEL), 2026. Credential ID:** NPTEL26MG61S553400534.
- **Solved 85+ DSA problems :** arrays, strings, linked lists, trees, graphs, DP, recursion, bit manipulation on LeetCode and GeeksforGeeks.
- **IEEE Student Chapter Lead (Jan 2025) :** Organized technical events, coding sessions, and collaborative learning activities for student members.
- **Built and Deployed 11+ Software Applications:** Successfully designed, developed, tested, and deployed full-stack web and machine learning applications from development to production.

Education

Dev Bhoomi Uttarakhand University <i>Bachelor of Technology (B.Tech), Computer Science & Engineering</i> – CGPA: 8.55 (First Three Semesters) – Lead, IEEE Student Chapter Participated in multiple hackathons and technical events.	Dehradun, Uttarakhand <i>2024 - 2028</i>
St. Mary’s Convent Sr. Sec. School <i>Senior Secondary (CBSE) – 80%</i>	Vikasnagar, Uttarakhand <i>Completed: 2024</i>
St. Mary’s Convent Sr. Sec. School <i>Secondary (CBSE) – 86.4%</i>	Vikasnagar, Uttarakhand <i>Completed: 2022</i>
